ERDI Shape and straight cutting snips D39ASS
Low-fatigue continuous cutting

Frictionless robust
The D39ASS Shape and straight cutting snips are therefore particularly smooth running and extremely wear-resistant:
- due to sintered steel insert in the joint area
- due to permanent threaded connection of the joint area with stable stud bolt
- due to stainless steel panel over the joint for protecting the spring beneath

Perfect cornering
They enable high-precision cutting of curves, also in the tightest of radii and with less risk of scratching the sheet:
- due to extremely compact cutter head with partially sunken threaded head connection

It is possible to use the complete cutting length with every cut:
- due to a significantly reduced handle opening angle

Effort-saving, easy to use
Right and left-handed users can lock and unlock the snips with ease, without a change in grip:
- due to central positioning of the latch on the top handle
