

Panel carrier

KFP series

Simply better.

Unique design

The BESSEY® Panel Carrier has a unique design that allows you to safely and conveniently carry panels and boards. The automatic tension adjustment provides the appropriate pressure for your materials, making it safe to carry in any position.

1 Ergonomic grip

The large handle is made of non-slip rubber for superior handling and a stable grip

2 Strong yet light

The metal frame is lightweight die-cast aluminum for added strength

3 Rotating jaws

- Spring loaded and self adjust to the size of the panel
- Die-cast zinc jaws for durability and strength
- Feature non-slip rubber to protect the material surface and provide optimum gripping power
- Carrying capacity 150 lbs

Panel carrier, KF

Safely transport panels with the BESSEY® panel carrier. The jaws have a high-friction rubber coating that can withstand up to 150 lbs of carrying weight.

	Opening	Approx. Weight
KFP	1/2" - 2 1/2"	2.2 lbs
