

**Press Release 05/2020 – New in the BESSEY product range:
Clever accessories for telescopic drywall supports of the STE and ST series**

Enormously versatile in use!

The telescopic drywall supports from BESSEY simply have what it takes. Besides the fixation of a wide variety of building materials, they can also be used for room partitioning, as simple burglary protection, for affixing cat nets and even for the construction of winter gardens or carports ... and much more ... using the new accessories.

BESSEY satisfies every requirement with its **telescopic drywall supports ST and STE**. Available in three sizes, the ST version already offers clamping options from 75 cm to 2.90 m and, at maximum extension length, can be loaded up to 60 kg.

If you want it to be **more powerful, more convenient and even higher**, then BESSEY offers the perfect solution **with the new STE version**. This proprietary development – available in three sizes – is the **most powerful model on the market**. The load limit is up to 200 kg at maximum vertical extension length and even up to 350 kg when the telescopic rod is fully retracted. The extremely sturdy steel construction and practical features allow fixation work at heights from 1.45 m up to even 3.70 m. As the **pump mechanism and quick-release button are an integral part of the ergonomically shaped handle**, the support can be adjusted to the exact requirements in a few simple steps – even with one hand – and released again safely.

The infinitely variable swivel range for both the ST and the new STE ranges from -45° to $+45^{\circ}$. Thanks to non-slip PVC contact surfaces, this means it can be used safely even on inclines.

Practical accessories

If wider support surfaces are required to fix the construction materials, the **new support plate STE-SP35 makes this possible**. The lightweight aluminium profile with anti-skid cellular rubber can be securely fixed to the contact area of the telescopic drywall support with four star grip screws, thus improving pressure distribution.

If, for example, lasers, cameras or construction lights are to be mounted, the **new fixture STE-LH** with $\frac{1}{4}$ inch threaded adapter offers an optimum solution. The L-swivel mount has two axes of rotation – 360° next to the fixing clamp and 180° on the threaded adapter – and can be mounted without tools on round (0-45 mm) and square (0-55 mm) support parts.

Depending on size, the telescopic drywall support of the ST series costs between 24.20 and 32.20 EUR and that of the STE series between 42 and 49 EUR. The price for the STE-LH multi-function/laser fixture is 15.90 EUR and for the STE-SP35 support plate 13.90 EUR (MSRP excl. VAT).

At BESSEY, we have a long tradition of producing such **innovative, practical product solutions** as this. Since the cold drawn steel plant was founded in Stuttgart in 1889, the Bietigheim-Bissingen based company continues to raise the bar in clamping and cutting technology. Currently offering more than 1,600 products, BESSEY has a specific solution for practically every application. Our focus is on precision and durability, convenience and safety. **"To stop improving is to stop being good."** This was the motto of company founder Max Bessey and it remains our guiding principle today – in all that we do and produce. This means that we are constantly developing new products and improving existing ones to make the user's life easier, on the basis of innovative ideas. Such innovations are worthwhile.
