Seaming tool PS 130, big and strong

For clamping and positioning components with a smooth surface

Your benefits at a glance:

1 **Vacuum pumps with control function**
The required vacuum is generated with only a few movements of the pump – for a maximum vacuum and top clamping force up to 1,200 N. The status of the vacuum can be checked at any time via a marking ring on the pump tappet and brought back up to the maximum by repeated pumping.

2 **Release button**
By simply pressing the release button, the vacuum disappears and the seaming tool can be removed quickly.

3 **Quick adjusting screw**
To quickly adjust the distance, simply undo the screws and slide the suction cups into the desired position via the guide rails.

4 **Sturdy construction**
The proven BESSEY all-steel rails, which run in anodised aluminium profiles, keep the suction discs on precisely the same level, even under high clamping pressures. This guarantees a precise finished result.

- For clamping and positioning large and potentially heavy components with a smooth surface, such as artificial stone, ceramic, granite, Corian®, plastic, sheet metal and glass
- Manual vacuum pumps for maximum suction power, and therefore a maximum level of horizontal clamping force up to 1,200 N
- Marking ring on the pump lever to permanently check for a reliable vacuum
- Practical quick adjustment function for rapid adjustment of the distance between the two suction cups

Corian® is a registered trademark of DuPont

Errors and omissions excepted.
