

Telescoping Support Rod

STE series telescopic drywall support

BESSEY® STE provides the support you are looking for. The single hand operation allows you to adjust the height with a twist of the wrist or push of the button. The robust design allows for higher load capacities.

1 Single hand operation

2-component plastic handle with pump mechanism keeps one hand free.

2 Extremely secure hold

Robust design allows for higher load capacities. PVC pads on top and bottom grab the surface for safe support.

3 Quick release button allows for fast retraction

Quick-slide button for rapid extension and retraction of the telescopic bar.

4 Heavy duty durable steel construction

Steel tube construction allows for higher load capacities.

5 Capable of 45° support

Continuously swivelling contact pads from -45° to +45°. Screw holes for additional support.

Telescopic drywall support STE with pump grip

Single handed operation with 2K handle and pump, all while guaranteeing a reliable and secure hold. Fine tune adjustment by pressing the pump lever until the swivel pad lies against the work piece, then turn the grip to the desired holding force. Release by first turning the grip, then pressing the release button – safe, one-handed operation.

	Adjustment Range	Clamping Force at min. extension	Clamping Force at max. extension	Approx. Weight
STE98	58"-98"	770 lbs	350 lbs	7.46 lbs
STE118	67"-118"	770 lbs	240 lbs	8.14 lbs
STE145	82"-145"	770 lbs	140 lbs	9.77 lbs
