

BESSEY Tool

**Press Release 02/2022 – New from BESSEY:
Horizontal fixture clamp WNS-SET-MFT**

Nothing will ever lift off here again!

Clamping tools are indispensable when working on multifunction tables. The BESSEY range also includes specialists such as toggle clamp sets, lightweight clamping elements with lever handle and all-steel table clamps. Now, new to the range is the innovative horizontal fixture clamp WNS-SET-MFT, another useful helper has been added.

Horizontal fixture clamps are attached on the side of the workpiece. The advantage of this is that tool parts don't interfere by leaning into the work area. Furthermore, the clamping lever's position on the side of the clamp provides even more freedom and the workpiece can be applied instantly. **The special feature on the new model from BESSEY is its patent-pending pull-down mechanism: It guarantees that the workpiece doesn't lift up when it is clamped and lays flat on the table surface, which is difficult to do with conventional systems.** When using the new WNS-SET-MFT, the workpiece sits more firmly on the table than with standard systems, lies perfectly flat and can thus be machined with precision.

BESSEY's innovative fixture clamp is also able to fasten the workpiece flat in place with a clamping force of up to 750 N without the use of a fastening screw that would normally be required. It only needs to be used if the holes provided for positioning are worn and the clamp being used has clearance.

The WNS-SET-MFT fits all standard multifunction tables 19 mm thick or more and with hole diameter of 20 mm – such as the Festool MFT or Sortimo WorkMo. It also clamps reliably on systainers with wood inserts and 20 mm punch holes. The bench dog included with the system can also be used as universal limit stops for workpieces. BESSEY offers them separately in sets of 4 under the product number BH-MFT.

*At BESSEY, we have a long tradition of producing **innovative, practical product solutions**. Since the cold drawn steel plant was founded in Stuttgart in 1889, the Bietigheim-Bissingen based company continues to raise the bar in clamping and cutting technology. Currently offering more than 1,600 products, BESSEY has a specific solution for practically every application. Our focus is on precision and durability, convenience and safety. "To stop improving is to stop being good." This was the motto of company founder Max Bessey and it remains our guiding principle today – in all that we do and produce. This means that we are constantly developing new products and improving existing ones to make the user's life easier, on the basis of innovative ideas. Such innovations are worthwhile.*
